

Gas Safety Information

CALOR

Always read and observe appliance manufacturer and our instructions.

A better choice

IF YOU CAN SMELL GAS OR SUSPECT A LEAK:

- **Do not** switch on or off any lights or electrical equipment, smoke or use naked flames
- No matter where you smell gas
 - Close the gas emergency control (shut-off) valve (a) outside your property **AND**
 - Close the handwheel valve (b) on the cylinder(s)

a) Typical emergency control valve (shown in yellow) b) Typical handwheel valve

- If the smell of gas is indoors, open all doors and windows and ventilate at floor level and all low level areas
- Ring the **Calor Emergency Service** (24 hour) on **0845 7 444 999**

IF A FIRE OCCURS:

- **Dial 999 immediately** to call the fire brigade. Ensure you tell them an **LPG cylinder(s) is on the premises.**
- Leave the premises and go to **a safe place.**
- If safe to do so, close the handwheel valve on the cylinder(s) and the emergency control valve outside your property

INSTALLATION AND SERVICING

- By law gas fixed indoor appliances **must be** installed and maintained by a CORGI registered installer.
- **All gas appliances need regular servicing.** Indoor appliances should be serviced annually. Read the appliance instructions for guidance. Never tamper with the equipment.
- **Always** provide adequate ventilation for appliances.
- **Never** use an appliance or equipment which is damaged in any way.

CARBON MONOXIDE

- Carbon Monoxide is a poisonous gas which can be formed by burning any fuel if the appliance is not properly installed or maintained.
- Carbon monoxide detectors are widely available and it is **strongly** recommended that every household has one.
- If you ever suffer any of following symptoms when an appliance is in use: headaches; nausea; dizziness; then turn it **off** immediately. Open windows and doors and have the appliance checked by a CORGI registered installer.
- Seek medical attention, if required.
